Interpretation:

Regarding the examined parameters and the mentioned limits of quantification, the sample corresponds to the EU-Regulation 396/2005.

A maximum residue level (MRL) of 0.01 mg/kg per substance and a maximum of two detected substances was set as legally non-binding benchmark by the German Organic Producers and Traders Association (BNN) for pesticide residues in organic food. Regarding the examined parameters and the limits of quantification the sample meets this requirement.
