- The above mentioned product(s) and the results mentioned in this Certificate of Analysis are in accordance with the parameters as stated in the specification of the product(s).
- The compliance to pathogenic criteria (among others E. coli, Salmonella and S. aureus) and to contaminant criteria (among them mycotoxins, heavy metals and pesticides), as stated in the product specification and/or EC legislation, is monitored via examination of randomly selected representative samples of our finished products by accredited external laboratories. The results can be found in the overview of microbiological monitoring results and in the overview of contaminant analysis results. These documents are issued in January of each year and contain the results of the previous year.
- The appearance, colour, odour, taste, flavour and purity of the above mentioned product(s) have been checked by means of organoleptical evaluation and conforms to our quality standards.
