

PREMIUM POT STILL MALT

TASTING NOTES
 NEUTRAL MALT FLAVOUR

PSY

410 Litres of alcohol – per tonne

Made from spring distilling approved varieties, our Premium Pot Still Malt is GN free to avoid any ethyl carbamate issues in the still. Flavourful and high alcohol yielding, this malt is the workhorse of many a Scottish distillery. The north east of Scotland produces especially low nitrogen barley which translates into excellent spirit yield in the distillery.

With enough diastatic power to convert itself and other malts, you can combine it with our speciality malts to create complex and layered whiskies.
