

Epicare DES

Colourless and perfume-free hand disinfectant

Performance

- ▲ Rapid disinfection with a broad efficacy spectrum
- ▲ Good skin compatibility

Efficiency

- ▲ Hygienic hand rub according to EN 1500
- ▲ Controlled dosage via Ecolab dispenser

Safety

- ▲ Following the correct hand disinfection procedures helps avoid cross contamination
- ▲ Dye and fragrance-free, ideal for daily hand disinfection in the kitchen and food processing areas

Hygienic Hand Disinfection acc. EN 1500 / Bactericidal	20 sec.
Virucidal against enveloped viruses DVV/EN 14476	30 sec.
Rotavirus	15 sec.
Adenovirus	60 sec.
Norovirus	120 sec.

Recommended use concentration and contact time: 3 ml / 30 sec.

Use instructions

1. Check hygiene plan and product label for detailed use information.

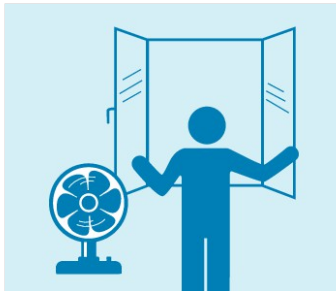

2. Wear suitable protective clothing when handling the product in original packaging.

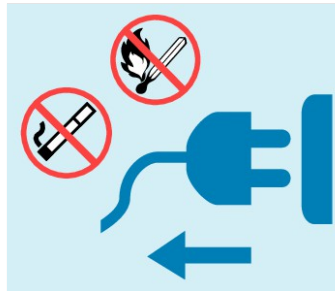

3. Apply 3 ml of Epicare DES on dry hands.

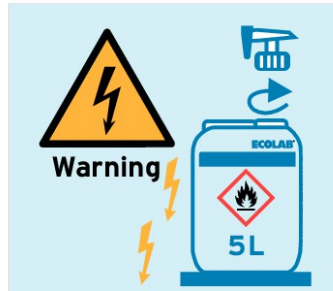

4. Keep hands wet during the entire soaking time (at least 30 seconds, in accordance with standard hand rub procedure EN 1500).

5. For filling refill bottles out of the 5 L canister please follow step 4 to 7: Prepare clean and vented workspace for refill.

6. Keep away from heat and sources of ignition. Unplug all the electric equipment.

7. Attention: Carefully read the safety instructions below. Secure grounding before handling/ opening canisters. Open 5 L canister for the refill procedure only and screw on filling tap. Place the canister on its side at an elevated position with the valve in the lowest position.

8. Consider using a drip tray around packaging and bottles. Open tap and fill refill bottle. Always decant into a labelled bottle and it has to be labeled with the product name, shelf life information and date of refilling.

Special notes

- ▲ Active substance: 100 g liquid contains 70.0 g 1-Propanol
- ▲ Use disinfectant safely. Always read the label and product information before use.
- ▲ The total shelf life of the product in the original packaging remains unaffected when refilled into smaller bottles. Frequent re-opening and closing of the packaging is taken into account and does not affect the shelf life when closed properly after each use or connected to a dispenser system.
- ▲ For professional use only.

Storage conditions

- ▲ Store between 0 °C and 25 °C in original closed container only.
- ▲ National safety guidelines and local legal requirements must be adhered to the handling and storage of packages of alcohol-based hand disinfectants.

Safety information

- ▲ Do not mix with other product.
- ▲ During transport, the 5 L plastic canisters can become statically charged due to mutual friction. When emptying or decanting, sparking can occur in the alcoholically saturated vapor space of the packaging. Therefore, measures must be taken to discharge or ground the packaging. Options to secure grounding can be: damp concrete floor, moisten the packaging, metal floor, static dissipative safety shoes for the handling staff. Best practice would be to spray 5 L canister with water before handling and once re-fill installation is in place.
- ▲ Dispose of packaging only if emptied and closed. Product residues: see Safety Data Sheet.
- ▲ For further Information and Safety instructions, please see product label and Safety Data Sheet.
