ONE WAY

Dolium

MOST ADVANCED ONE-WAY KEG

... LIKE MANY GREAT IDEAS,
DOLIUM® WAS BORN OUT OF NECESSITY.

Our founder Albert Wauters is a second-generation Belgian beer man who developed the first generation DOLIUM® keg after more than 25 years of R&D and Product Development. And like many great ideas, DOLIUM® was born out of necessity; Albert could not find the solution he was looking for on the market, so he struck out on his own and brought the first DOLIUM® keg to market in 2013.

By offering a user friendly, cost-efficient, and sustainable alternative to stainless steel kegs, DOLIUM® solves the problems many beverage companies face with the high costs of low-rotation markets and long-distance shipping.

Today, DOLIUM is based in Antwerp, Belgium with distribution partners in 30 countries — and in just 5 years has become the gold standard in one-way packaging solutions to the beverage industry.

With more than 50 years of combined beverage experience we are beverage people at our core. Our aim is to be your innovation partners.

WHY ONE WAY?

- * Low rotation and long-distance markets
- * During seasonal peaks
- * Opening new markets
- * For new product innovations and market tests
- * New channels like festivals, cafes, office canteens and other non-traditional outlets where account services and return logistics are difficult

ALL DOLIUM[®]
KEGS COME TO
YOUR OPERATION
CLEAN, STERILE,
DRY AND READY
TO USE.

WHY CHOOSE DOLIUM?

PRODUCT INTEGRITY

DOLIUM® kegs can offer shelf life equal to stainless steel due to our monolayer construction and 3-barrier technology:

Active barrier: O2 scavenger

Passive barrier: CO2

UV barrier – amber color = “light strike” protection

COMPATIBILITY

to all existing filling and dispense equipment with no incremental investment. DOLIUM® is also re-connectable at the point of sale which means no loss of liquid.

FILLING SPEED

DOLIUM® fills equal to stainless steel and faster than the competition.

DESIGN

Optimized geometry for better stacking, palletizing, and handling; you can also get more kegs in the fridge at your customer.

TRACK AND TRACE

All DOLIUM® kegs feature QR codes for easy track & tracing throughout the supply chain.

READY TO USE

All DOLIUM® kegs come to your operation clean, sterile, and dry and ready to use. They are also pressurized at 1.0-bar with either CO2 or N2.

SAFETY

Only DOLIUM® offers an integrated Pressure Release Valve that guarantees the safety of the keg. If the keg becomes over pressurized due to temperature variation or fermentation, the PRV opens at 5.0-bar and blows off excess pressure -- and then recloses at 2.0-bar without any loss of liquid.

MORE SUSTAINABLE

DOLIUM® kegs have the lowest environmental impact of all one-way kegs and better than stainless steel.

12,5 L Slimline MINI 20L Slimline
