

THE TRITORDEUM MALT

A cross between **wild barley** and **durum wheat**, Tritordeum is a unique hull-less grain which inherits beneficial agronomic traits from its parental species, such as disease resistance (rust, septoria), abiotic stress resistance (drought, heat, salinity) and nitrogen use efficiency.

Tritordeum is a great fit for **organic farming** and is currently thriving in the hands of passionate farmers throughout Europe and Australia.

Our selected Tritordeum can provide a **unique combination** of high enzymatic power and high extract, with the benefit of low beta-glucans.

Tritordeum has a **record-high lutein content** (10x wheat) which greatly contributes to the flavour profile and pigment.

MALT SPECIFICATIONS.

Colour	4.5 - 9.5 EBC
Extract:	>80%
Enzymatic activity	350-550 Wk
Beta-glucan:	<100mg/l
